<u>Product</u>	<u>Recommended Uses</u>	<u>Benefits</u>
Compost		
Prairiewood Fines	Soil amendment (1"-2") for existing flower beds. To make new beds over existing lawn, spread (4'-6") in Fall and overwinter to kill grass, then till in Spring	Excellent for loosening heavy clay soils, or building soil in existing beds
Garden Compost	Soil amendment (1"-2") tilled into soil in Spring; topdressing (½"-2") for lawns or raised beds; potting soil mix (25%-30%)	High in humus, beneficial soil organisms, rejuvenates existing soil
Horse Manure Compost	Soil amendment for vegetable gardens (1"-2") and till into soil	Great for vegetable gardens, contains more nutrients than leaf based compost
Topsoil		
Planter's Soil	Raised bed gardens (up to 8")	Vigorous plant growth, drains well
Blended Topsoil	New lawns and gardens (up to 6")	Stays loose, plants root quickly and deep, holds moisture and nutrients
Mulch		
Garden Mulch	Vegetable and flower gardens (2"-3") apply to surface as needed	Ideal for soil building, breaks down to form soil within 1 season
Natural Brown AA	Trees and shrubs (3"-4")	Weed barrier, moisture holding; semi-annual applications are normal; fades to natural gray
Prairiewood Mulch	Flower beds and new plantings of trees or shrubs (2"-4"); for mulch build up problem on existing beds (2"-4")	Builds soil rapidly; breaks down within 1 season; stays dark brown naturally
